Portfolio:

PROFESSIONAL SUMMARY

AI Automation and Full-Stack Solutions Developer with a background in Computer Science and professional experience spanning software development, business applications, workflow automation, digital transformation, and business operations. Experienced in designing, developing, and deploying functional web applications, AI-powered business solutions, and automated workflows using Python, JavaScript, React, Next.js, PostgreSQL, and AI APIs. Skilled in translating business requirements into practical technology solutions, integrating third-party services, developing business applications, and automating operational processes. Combines hands-on software development experience with business management, project coordination, stakeholder engagement, and technical training. Particularly interested in developing AI-powered applications, intelligent automation systems, and scalable business solutions for international organisations.

CORE TECHNICAL SKILLS

Programming & Application Development
Python, JavaScript, React, Next.js, HTML5, CSS3, PHP, Bootstrap

Artificial Intelligence & Automation
AI API Integration, AI App & Agent Development, Process & Marketing Automation, AI-Assisted Dev, Claude Code

Databases & Integration
PostgreSQL, MySQL, Oracle Database, REST API Integration, Data Processing & Management

Microsoft Business Applications
Microsoft Power Apps, Power Automate, Power BI, SharePoint, Microsoft 365

Development & Delivery
Git & GitHub, Application Deployment, Requirements Gathering, Business Process Analysis, Documentation

Additional Capabilities
Business Operations, Project Coordination, Technical Training, Stakeholder Communication, Digital Transformation

PROFESSIONAL EXPERIENCE

YESDIN TECHNOLOGIES LIMITED | **Business Manager / Power Platform Developer & Project Coordinator** 2021 – Present

- Coordinate business operations and technical solution delivery for clients and internal systems.
- Develop custom business applications using Microsoft Power Apps to streamline daily operations.
- Design and deploy automated workflow solutions using Power Automate to optimize task efficiency.
- Utilize SharePoint and Power BI for centralized information management and business intelligence reporting.
- Translate complex client requirements and operational bottlenecks into practical, scalable digital solutions.
- Coordinate cross-functional project teams, stakeholder communications, and technical implementations.

BORDERLESS TEK | **General Manager / Digital Solutions & Technology Operations** 2024 - 2026

- Directed technology education operations, digital initiatives, and instructor workflow management.
- Supported the design, implementation, and maintenance of digital learning systems.
- Developed AI-powered solutions to automate marketing, customer onboarding, and operational processes.
- Identified operational friction points and automated repetitive business activities to enhance overall customer experience.

ROOK TECHNOLOGIES | **Power Apps Developer** 2020 – 2021

- Developed business applications using Microsoft Power Apps.
- Supported the development of digital solutions for operational requirements.
- Worked with business application technologies and workflow processes.
- Collaborated with key stakeholders to align digital tool designs with corporate operational objectives

SELECTED SOFTWARE DEVELOPMENT PROJECTS

1. AI-Powered Marketing & Customer Onboarding Agent

Technologies: Python, JavaScript, AI APIs, [Framework/Database]

Developed an AI-powered employee solution designed to support marketing and customer onboarding activities for an online technology education business.

Key capabilities:

- AI-assisted marketing activities.
- Customer onboarding workflows.
- Business process automation.
- Intelligent interaction and task execution.

2. Marketing & Lead Generation System

Technologies: Python, JavaScript, [Database/Framework]

Developed a lead generation application designed to extract, organise and manage business contact information for marketing activities.

Key capabilities:

- Automated contact discovery and extraction.
- Data processing and organisation.
- Lead management.
- Marketing support workflows.

3. Agri-Food Innovation Learning Management System

Technologies: Next.js, React, PostgreSQL

Designed and deployed a learning management application for an agri-food innovation initiative.

Key capabilities:

- Digital learning management.
- Student and course administration.
- Centralised information management.
- Web-based application access.

4. Multi-Vendor Currency Rate Comparison Platform

Technologies: Next.js, React, PostgreSQL, REST APIs

Developed a platform that aggregates currency exchange rates from different vendors and enables users to compare available rates.

Key capabilities:

- External data integration.
- Currency rate aggregation.
- Vendor comparison.
- Data presentation and analysis.

5. Automated Forex Trading Platform

Technologies: Python, JavaScript, Financial & Trading APIs

Designed and developed an automated forex trading application incorporating trading logic and financial data integration.

Key capabilities:

- Automated trading workflows.
- Financial data processing.
- Trading strategy implementation.
- Application-based monitoring.

6. Web Development

Series of Websites development

EDUCATION & CAREER INTERESTS

Higher National Diploma in Computer Science — Crown Polythecnic

Career Focus: AI Application Development | AI Automation | Full-Stack Development | Business Systems | Intelligent Workflow Automation | Digital Transformation

Ordinary National Diploma (OND) | Aug 2014

Lagos State Polytechnic, Ikorodu, Lagos State

Senior Secondary School Certificate (SSCE) | Jun 2009

Folakemi Comprehensive High School, Ifo, Ogun State

CERTIFICATIONS & HONOURS

- National Youth Service Corps (NYSC) | 2018
- Accounting for Non-Accountants | 2015
- Departmental Outstanding Student, LASPOTECH | 2014
- President, National Association of Computer Science Students | 2014
- Scrum Master | 2022
- Critical Thinking and Problem Solving | 2022
